Kévin Charit, Frontend Engineer

I'm a Senior Frontend Engineer with over 10 years of experience, passionate about crafting user-friendly interfaces thanks to JavaScript and HTML languages mostly using Vue.js or React Native frameworks. I thrive on improving processes throughout the development lifecycle, from concept to testing until to release.

Employment History

Lead Frontend at Luko, Paris

November 2021 — Present

- Developed a flexible and user friendly onboarding flow based on Vue.js to onboard user on multiple insurance products.
- Testing : Implemented E2E and unit tests to ensure code quality and product stability.
- Monitoring and Analysis: Developed and deployed SLIs/SLOs and dashboards on Amplitude and Sentry to monitor system performance and availability.
- Leadership: Managed a full-stack team of 3 individuals, providing mentoring and coaching to enhance productivity and skills.
- Management: Led a squad and collaborated with product managers to draft specifications, ensuring a shared vision and successful deliveries, improving team rituals and processes (Daily, Refinement, release process, QA process)
- Growth: Established and tracked personal and team-level OKRs to align objectives with strategic initiatives.

React Native Developer at Luko, Paris

May 2020 — November 2021

- Worked on the Luko application using React Native, with a focus on ES6 and a recent transition to TypeScript.
- Design system : Developed a cross-platform application with distinct designs for iOS and Android platforms by implementing a custom design system.
- Data management : Utilized Redux for state management, React Query for efficient data fetching, and Apollo for GraphQL-based solutions in data fetching and management.
- Testing : Implemented rigorous testing practices, including Jest for unit testing and Detox for end-to-end testing, ensuring the quality and reliability of the application across various scenarios.
